SUMMARY

Certified ETL and Data Engineer with over 3 years of experience in designing, building, and maintaining scalable data pipelines using Azure Data Factory (ADF), DBT, Fivetran, and Snowflake. Skilled in SQL, Python, and data modeling, with hands-on expertise in integrating data from multiple sources. Experienced in developing schema drift-tolerant, configuration-driven ETL frameworks with built-in validation and alerting. Possess working knowledge of Power BI and Sisense for analytics and business insights.

Skills : Azure Data Factory (ADF), Snowflake Data Warehousing., DBT, SQL, Python, PySpark, Power BI, Sisense, Streamlit, Fivetran, Pinecone, Snowpark, SnowSQL, Stored Procedures, Data Vault, ETL Pipelines, Data Orchestration, Data Ingestion, Data Transformation.

Certification : Snowflake SnowPro Core, Microsoft Certified: Azure Data Engineer Associate

EXPERIENCE

Data Engineer, Anblicks Jan 2023 - Present

- Designed and maintained scalable data pipelines using Azure Data Factory (ADF) and Fivetran to ingest data from diverse sources including SQL Server, MySQL, Azure SQL MI, and AWS S3 into Snowflake.
- Implemented robust, schema drift-tolerant, and config-driven frameworks with embedded auditing, validation, and alerting mechanisms to ensure data integrity and operational reliability.
- Applied Data Vault 2.0 modeling techniques using DBT, developing modular models and custom macros to support both incremental and full-load strategies.
- Authored SQL-based ELT logic and stored procedures, integrating transformation workflows seamlessly with ADF orchestration.
- Built and supported dynamic dashboards using Power BI and Sisense Elasticubes, enabling real-time insights and reporting for stakeholders across leading hospitality clients.
- Developed internal QA and observability tools to monitor pipeline health, track data lineage, and validate model accuracy—enhancing trust in the data platform.
- Collaborated with senior data engineers to align on architecture and best practices, gaining hands-on exposure to modern cloud-native data stacks and enterprise-scale implementations.
- Received comprehensive training in end-to-end data engineering concepts, with emphasis on cloud-based platforms, automation, and scalable ETL development.
- Demonstrated proficiency in Python, SQL, and cloud tools to support continuous integration, transformation, and delivery of reliable data solutions.

Data Engineer Intern, Anblicks Dec 2022 – Mar 2023

- Designed and implemented an end-to-end data pipeline to migrate structured and semi-structured data from Azure Data Storage to Snowflake Data Warehouse using Azure Data Factory (ADF).
- Developed parameterized pipelines and leveraged configuration-driven techniques to enable dynamic, reusable, and scalable data workflows.
- Performed data transformation and processing in Snowflake using SQL and Snowpark, ensuring data accuracy, consistency, and performance optimization.
- Designed and built interactive Power BI reports to provide actionable insights, enabling data-driven decision-making for stakeholders.

EDUCATION

Bachelor of Technology, Andhra Loyola Institute of Engineering And Technology

Aug 2019 - May 2023

Computer Science And Engineering

PROJECTS

Actabl – Hospitality Data Platform(Current)

- Built scalable and automated data pipelines using Azure Data Factory (ADF) and Fivetran to ingest data from Various Sources into Snowflake.

- Developed schema drift-tolerant, configuration-driven frameworks with embedded auditing, validation, and alerting to ensure reliability and data quality.
- Implemented Data Vault 2.0 modeling using DBT, leveraging modular design and custom macros to support both incremental and full-load strategies.
- Scheduled and orchestrated DBT transformation jobs through ADF and Fivetran workflows, enabling seamless ELT processing.
- Authored Snowflake stored procedures to perform complex transformation logic and streamline business rule implementation within the data warehouse.
- Built and supported Sisense Elasticubes, providing real-time analytics and insights for hospitality clients.
- Led automation efforts to enhance efficiency and monitoring:
- **DBT Automation:** Captured model execution logs, error traces, and performance metrics; stored results in Snowflake; triggered real-time alerts via Slack and email.
- **Validation Tool:** Developed a lineage-based row count comparison tool that automatically flagged deviation percentages across source and target systems.
- **Sisense Comparator App:** Built a Streamlit-based tool that programmatically compared dashboard filters, widgets, and data sources across environments using Sisense APIs, ensuring version consistency and reducing manual QA effort.

SnowGPT – AI-Powered Chatbot for Document Retrieval from Snowflake :

- Developed an AI-driven chatbot to enable seamless, conversational access to documents stored in Snowflake using a natural language interface.
- Retrieved files securely via pre-signed URLs from Snowflake external stages, ensuring scalable and controlled document access.
- Generated vector embeddings using OpenAI models and stored them in Pinecone to enable semantic search and context-aware retrieval.
- Built a real-time Q&A interface using Streamlit, allowing users to query document content interactively and receive accurate, relevant responses.
- Integrated vector similarity search with large language models to create an efficient, scalable solution for intelligent document discovery across Snowflake-managed content.

AWARDS AND RECOGNITIONS

Rookie Award – Anblicks (2024) Recognized for outstanding contributions to the Actabl Project, ensuring the stability of critical data pipelines and automation processes.

Standout Performer – Anblicks (2023 & 2025) Acknowledged for exceptional problem-solving skills and efficiency in optimizing ETL workflows.

SnowPro Core Certified – Snowflake Earned industry-recognized certification for expertise in Snowflake data engineering and cloud data management.

Microsoft Certified Azure Data Engineer Associate - Earned industry-recognized certification for expertise in Azure data engineering and cloud data management.
