

SHIVA KUMAR NALLAVELLI

AZURE DATA ENGINEER | SNOWFLAKE DEVELOPER | DATA BRICKS EXPERT

+91 9640551433 || <mailto:kumarshiva76229@gmail.com> ◇ || [LinkedIn: shiva Kumar-nallavelli](#)

SUMMARY

Data Engineer with 3.1 year's of Experience in building Robust data pipelines and ETL/ELT Processes using Python, SQL , Snowflake, Data bricks, ADF, AWS, and Azure. Experienced in Spark and Big Data Technologies.

EDUCATION

Bachelor of Information Technology (CGPA: 8.1/10), CVR College of Engineering 2019 – 2023

SKILLS

Languages	Python, Sql, Java
Library/Frameworks	Pyspark, Pandas, NumPy, Matplotlib, Snowpark, Spark
Cloud/Tools/Technology	Data bricks, Snowflake, Azure, Azure Data Factory, Azure Storage's, Azure key Vault, AWS, Lambda, Glue, SSMS, Big Data, MongoDB

EXPERIENCE

Data Engineer **Anblicks** Jan 2023 - Present *Hyderabad*

- Designed and Implemented Efficient ETL Pipelines using Azure Data Factory (**ADF**) and **Data bricks**, reducing data Processing **Execution time by 30%** and Improving overall workflow efficiency.
- Worked Extensively with **Snowflake** and Data bricks for data warehousing, implementing performance tuning techniques such as **Clustering** and query **optimization**.
- Engineered an automated data ingestion pipeline from AWS S3 and Azure Data Lake via **ADF** and **SnowPipe**, reducing daily manual effort and cutting operational **costs by 25%** through efficient, event-driven processing
- Secured sensitive data using Azure Key Vaults, AWS Secrets Manager ensuring compliance with security best practices. Managed large-scale data ingestion and processing in Azure Data Storage , AWS Lambda, and orchestrated workflows with ADF.

PROJECTS

ACXIOM / DATA MODERNIZATION

- Migrated 50+ Oracle scripts and 30+ workloads to Snowflake using **Snow Convert** and Python, boosting processing **speed by 30%** and resolving all compatibility issues.
- Automated DDL extraction and migration workflows with Python, cutting **manual effort by 80%** and ensuring data accuracy.
- Constructed secure data pipelines from AWS S3 to Snowflake's medallion architecture, managing encryption for Bronze, Silver, and Gold layers.
- Streamlined data processing by developing Python stored procedures and built a Streamlit dashboard to track migration progress and validate outputs.

Advance Auto Parts(AAP)

- Migrated 20+ complex Talend ETL jobs to Snowflake-native pipelines, leveraging **Stored Procedures** (SQL/Python), External Stages, and Storage Integration's for seamless orchestration and data ingestion from diverse sources like AWS S3, Oracle, Data lake , SQL Database and Salesforce.
- Created secure and High-Performance data integration's, collaborating with cross-functional teams to validate **data accuracy**, integrity, and performance post-migration.

AWARDS AND CERTIFICATIONS

- Snowflake SnowPro Core Certified** – Earned industry-recognized certification for expertise in Snowflake data engineering and cloud data management.
- Microsoft Certified Azure Data Engineer Associate** - Earned industry-recognized certification for expertise in Azure data engineering and cloud data management.
