PROFESSIONAL SUMMARY

Data Engineer with 3 years of experience in building scalable data pipelines and delivering data-driven solutions. Proficient in Python and SQL, with hands-on experience in ETL/ELT processes using Snowflake, Databricks, and Azure Data Factory (ADF). Skilled in working with structured and semi-structured data across cloud platforms.

EDUCATION

Bachelor of Information Technology (CGPA: 8.1/10), CVR College of Engineering	2019 – 2023
State Board Of Intermediate Education-Class XII (979/100), Jagruthi Junior College	2017-2018

SKILLS

Languages	Python, Sql, Java
Library	Pyspark,Pandas, NumPy, Matplotlib, Snowpark
Tools/Technology	Databricks, Snowflake , Azure Data Factory, Azure Storages, Azure KeyVault, AWS S3 bucket, AWS IAM, AWS Secrets Manager, AWS Lambda , SSMS, VS Code, OpenFlow

EXPERIENCE

Data Engineer	Jun 2023 - Present
Anblicks	Hyderabad

- Designed and Implemented Scalable ETL pipelines using Azure Data Factory (ADF) and Databricks, optimizing data processing and reducing execution time.
- Worked extensively with Snowflake and Databricks for data warehousing, implementing performance tuning techniques such as clustering and query optimization.
- Built real-time data processing jobs in Databricks (Delta Lake) for streaming analytics.
- Automated data ingestion from AWS S3 Azure Blob Storage using Azure Data Factory,Snowflake native features,AWS Services reducing manual efforts.
- Secured sensitive data using Azure Key Vaults,AWS Secrets Manager ensuring compliance with security best practices.Managed large-scale data ingestion and processing in Azure Data Storage,AWS Lambda, and orchestrated workflows with ADF.
- Developed and optimized PySpark scripts for efficient data transformations and processing in Databricks.Used SQL (SSMS) for querying and managing relational databases, ensuring data consistency and performance.
- Built interactive Power BI dashboards to provide business insights, integrating data from Snowflake and other sources.Explored Machine Learning and AI concepts, applying basic models for data analytics and forecasting.

Data Engineer Intern	Jan 2023 – Jun 2023
Anblicks	Hyderabad

- Designed and implemented an end-to-end data pipeline to migrate structured and semi-structured data from Azure Data Storage to Snowflake Data Warehouse using Azure Data Factory (ADF).
- Developed parameterized pipelines and leveraged configuration-driven techniques to enable dynamic, reusable, and scalable data workflows.
- Performed data transformation and processing in Snowflake using SQL and Snowpark, ensuring data accuracy, consistency, and performance optimization.
- Designed and built interactive Power BI reports to provide actionable insights, enabling data-driven decision-making for stakeholders.

PROJECTS

ACXION /DATA MODERNIZATION — Snowflake, Aws,Oracle,Streamlit

- Converted complex Oracle scripts into Snowflake-compatible SQL using the SnowConvert tool, followed by manual code refinement where automated conversion failed due to EWI and FDM limitations.
- Resolved conversion issues and ensured successful execution of migrated scripts in the Snowflake environment, improving the overall code accuracy and system compatibility.
- Optimized and simplified legacy Oracle logic, reducing code complexity and enhancing performance across migrated workloads.
- Migrated and validated 30+ customer Oracle scripts to Snowflake, ensuring accuracy, maintainability, and improved data processing speed.
- Developed advanced Python logic to extract Oracle DDLs from Excel tabular formats, transformed them into valid Snowflake-compatible DDLs, and integrated the flow with SnowConvert.
- Handled sensitive data encryption and decryption workflows: securely ingested encrypted files from S3, decrypted them using Python, and loaded them into Snowflake's Bronze, Silver, and Gold layers..
- Authored complex Snowpark stored procedures to orchestrate end-to-end logic execution and unify disparate processing steps into a single, maintainable codebase.
- Built and deployed a Streamlit dashboard to provide business users with a user-friendly, visual interface to track data migration progress and validate output from a business perspective

Advance Auto Parts(AAP) — Snowflake, AWS,Talend

- Migrated 20+ Talend ETL/ELT jobs to Snowflake, successfully recreating complex data pipelines using Snowflake-native features.
- Integrated data from diverse sources including Oracle, SQL Server (SSMS), AWS S3, Salesforce, and ServiceNow into the Snowflake Data Warehouse.
- Designed and implemented modular, reusable Stored Procedures in Snowflake using SQL and Python for complex transformation logic and orchestration.
- Created and configured External Stages for seamless data ingestion from AWS S3 and other cloud sources.
- Collaborated with cross-functional teams to validate data accuracy, integrity, and performance.
- Built and maintained Storage Integrations and Security Integrations for secure and scalable data access.

CBRE/ Snowpatrol — Azure, Snowflake, DataBricks, Power BI

- Developed an end-to-end data pipeline for processing and analyzing business data, enabling actionable insights through Power BI dashboards
- Utilized Azure Data Factory (ADF) for fetching data from APIs and ingesting it into Azure Data Lake Gen2.
- Performed data transformation and aggregation using Azure Databricks to process raw data from the Bronze Layer and store it in the Silver Layer
- Implemented Azure Synapse Analytics to model and query curated data, storing the results in the Gold Layer of Azure Data Lake Gen2
- Created interactive dashboards in Power BI to showcase key insights, including Real-time business performance metrics , Trends and patterns in data usage

AWARDS AND RECOGNITIONS

- **Snowflake SnowPro Core Certified** – Earned industry-recognized certification for expertise in Snowflake data engineering and cloud data management.
- **Microsoft Certified Azure Data Engineer Associate** - Earned industry-recognized certification for expertise in Azure data engineering and cloud data management.
